

MWA Intelligence, Inc. Partners With nddPrint

MWA FORZA, built on SAP Business One, has integrated with nddPrint to deliver a complete MPS Meter Solution to the imaging channel.

MWA Intelligence, Inc. and nddPrint have collaborated in efforts to meet the needs and the demands of the industry's marketplace. Through this global partnership, FORZA's ongoing development has led to greater value for the dealership community.

With this integration, MWA has automated billing processes to offer an efficient and cost-effective solution to customers for MPS toner replenishment and services. The strategic alliance has also effected FORZA's Internet-of-Things (IoT) capabilities by extending them for optimum performance.

The effect of nddPrint's solution on supplies replacement functionality for the industry.

"nndPrint's MPS Replacement Flow solution provides a more efficient and effective capability for organizations to seize control over their supply inventory. Its ability to identify immediate and future replenishment needs for dealers is an impressive adoption of the digital transformation overtaking modern business practices.

Automated processes – such as the supply fulfillment that creates requests for immediate replenishment – provide better customer relationship management. With the additional capability to increase accuracy for forecast supplies needed for near future fulfillments enables dealers to be prepared while minimizing the quantity held in stock. This proactive solution empowers users to optimize their logistical management for greater control that will reflect positively in the organization's bottom line."

- Jeff Campbell, Chief FORZA Architect at MWA

FORZA's Main Integration Points Between Solutions Heightens Dealership Performance

Automated Meter Collection
Reduce costs of collecting meters manually for optimized billing processes

Supply Replenishment
Systemize supply fulfillments for timely shipments that correspond to the completion of toner usage

Service Alerts
Streamline service call generation to analyze data prior to technician rollout, ensuring efficient dispatch procedures

Supply Forecasting
Decrease inventory with precise forecasting for future demand while increasing cash flow
